Good Health Es Tu Poder

Blood Pressure¹

High blood pressure is a leading cause of heart attacks, strokes, diabetes, kidney disease, and other conditions.

Total Cholesterol²

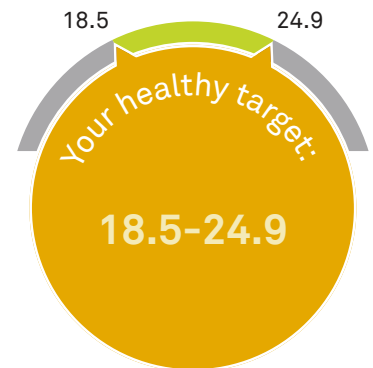

High cholesterol may put you at risk for heart disease or stroke.

Blood Sugar³

Consistently high blood glucose/sugar is typically seen in individuals at increased risk for diabetes and those with diabetes.

Body Mass Index⁴

A BMI of 25 or above is linked to an increased risk for health conditions such as heart disease, stroke and diabetes.

If your numbers fall below the healthy ranges listed above you may also be at risk for certain health conditions. Contact your doctor if you do not fall within the healthy ranges.
