

Know your risks. Know your status.

ME?

Yes, everyone between 13 and 64 is recommended for HIV testing if you have never been tested or are:

Pregnant

Being treated for a new STD

Starting a new sexual relationship

50K

new infections every year

More frequent testing is recommended for those in **high-risk groups**:

Taking PrEP medication

Men who have sex with men

Injection drug users

Exchanging sex for money

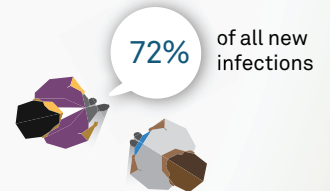

Sex partner of someone with HIV

And those in **ethnic groups** who have higher rates of HIV infection:

African Americans

Hispanics/Latinos

Know now with the latest 4th generation blood test.

EASY

Talk to your healthcare provider, then visit **any Quest Diagnostics** location.

QUICK

Your healthcare provider may have your results **within 24-48 hours**.

ACCURATE

Latest lab tests provide **definitive results** so you can be absolutely sure.
