

BioPharma Services **Central Lab**

Your lab partner **for all phases of clinical trial testing**

Our central lab provides an integrated, flexible, one-stop solution for the collection, management and analysis of lab and study data to support the success of your clinical trial.

Advanced capabilities

We are always at the forefront of science

We offer cutting edge technology platforms and assays—powered by our clinical trial lab experts—to deliver specialty testing across our network of labs around the world.

- Genomic labs
- Flow cytometry
- Traditional and digital anatomic pathology and histology
- Vaccines labs
- Purpose-built companion diagnostic lab and manufacturing facility
- Cell and gene therapy focus
- Core testing: special chemistry, hematology, microbiology, and urinalysis

Unique perspectives

Expertise at every touchpoint

We dedicate project managers and project staff to every project.

Experienced team

Our experienced team recognizes the time and effort you've invested and are committed to supporting your needs. We are dedicated to providing the highest-quality lab support services to help bring your innovative new treatments to market.

- Project management
- Data management
- Therapeutic area expertise
- Lab science expertise

You can count on Quest Diagnostics BioPharma Services to support every step of your study

Reporting and data transfer Rapidly delivering the data you need to inform decision-making

We are committed to delivering accurate, reliable, and timely results to support research goals and inform your decision-making.

Initial human data are a critical development milestone. We ensure all study data is collected, stored, and analyzed according to regulatory requirements and ethical standards.

We offer data transfer—data format, file type, transfer type, and transfer method—to meet the specification needs of your study.

Tailored solutions at every phase

Our team supports you in getting the right therapy to the people who need it

- Early clinical (Phase I-IIa)
- Late clinical (Phase IIb-III)
- Phase IV studies
- RWE studies
- REMS programs

Wide range of assays

We offer one of the largest test menus of any commercial lab with over 3,500 clinical assays and another 1,000+ RUO and IUO assays ready to be used.

- Biomarker analysis
- Chemistry
- Genetic testing
- Hematology
- Serology
- Urinalysis
- PCR
