

Workforce wellness redefined

Tailored health, safety, and well-being solutions for employer success

Workforce Health Solutions can help

Enhance health equity and access through comprehensive screening

Customer case study*

A regional finance and benefits organization of 70K+ employees was seeking a more comprehensive solution for employee health screenings beyond their existing on-site offerings. The goal was to increase health equity and provide easier access to care for their workforce while standardizing their screening processes.

Solutions provided

Convenience and scalability

Solutions tailored to ensure employee ease of access across multiple modalities

Personal health snapshot panel

On-site, Patient Service Center (PSC), and home kit options

Additional services

Flu vaccinations, colorectal cancer screening kits, and lab testing consolidation through a single platform

Reduction in medical spend through standardized testing, with increased access to care

*Based on real client results

Workforce Health Solutions can help

Empower employers with insights to improve workforce health

Customer case study*

A national insurance organization with over 75,000 employees was seeking a new wellness strategy that would leverage data to uncover employee health trends and improve access to care. Their previous wellness platform lacked measurable impact, and they needed a solution that could demonstrate clear health outcomes while connecting at-risk employees to the care they needed.

Solutions provided

MyHealth comprehensive panel
Provided comprehensive health screening data for over 20,000 employees

Flu vaccinations
Delivered on-site and remote care options for employees across multiple regions

Health risk assessments
Uncovered mental health and stress-related risks, offering insights into actionable health areas

Achieved a 20% participation rate, generating health data for 20K+ employees

*Based on real client results

Workforce Health Solutions can help

Deliver data-driven wellness solutions to mitigate risk and control healthcare costs

Customer case study*

A national technology and manufacturing organization with 95,000 employees partnered with us to enhance their wellness programs, reduce healthcare costs, and promote workplace safety. They sought a comprehensive solution that could provide insights into employee health risks, enabling them to take action and reduce healthcare spending while improving overall safety.

Solutions provided

MyHealth comprehensive panel
Identified health risks and directed employees to follow-up care

Safety and reduced risk
A comprehensive drug testing panel enabled workplace safety and mitigated accidents and related costs

Cost savings
QuestSelect provides access to discounted lab services, helping them control lab testing expenses

Identified that 30% of the workforce is at risk for prediabetes/diabetes

*Based on real client results
