

Confidence in coverage

When cost is a concern, Quest has you covered

Comprehensive autoimmune screening solutions help enable faster diagnosis, referral, and treatment. But is this testing covered by insurance? For most patients, the answer is yes.

Approximately 71% of insured patients do not receive a bill for ANalyzer™, our most comprehensive autoimmune screening panel¹

Quest is in-network with 90% of insured lives nationwide^a

^aThis is directional data. It is based on 2020 HealthLeaders membership data of private third-party payers at the Managed Care Organization (MCO) level as well as Quest internal data. Information is believed to be accurate as of January 1, 2020; however, it is subject to change. Does not include Kaiser Permanente access data.

Reassure patients with our health plan look-up tool and Patient Assistance program

Many patients ask, “Is Quest in-network with my health plan?” With our health plan **look-up tool**, you can confirm before ordering a test.

Our **Patient Assistance Program** can help patients get the testing they need, even when they are uninsured or underinsured, through payment plans or financial assistance.

1 test code. More answers. The support you and your patients need.

We help make testing easy and accessible for you and your patients by offering flexible comprehensive autoimmune screening solutions that are backed by extensive support services.

More options

A portfolio of comprehensive reflex and fixed panels that you can order based on your patient’s needs

Experts at hand

A team of MDs and PhDs you can consult with on test ordering and results interpretation

Greater access

Testing that is covered by most health plans and available through approximately 2,400 Patient Service Centers
