

Is your lab keeping up with demand for pathology— or constantly catching up?

Demand fluctuates. Extra capacity and flexibility can help you stay ahead

Many labs are built to operate at steady state. But when demand increases, backlogs grow, and teams are stretched thin, turnaround times can slip.

Expanding internal capacity isn't always the answer. Hiring, training, and maintaining full histology and pathology coverage increases cost and complexity—without addressing variability.

98% 

of hospital systems surveyed said that their internal pathology service level is impacted by technical staff shortages¹

85% 

said short-term spikes in pathology service demand impact turnaround time¹

Extend capacity without expanding your team

A flexible approach helps your lab maintain control of core operations—while extending capacity, capability, and coverage where it's needed most.

Technical component (TC)

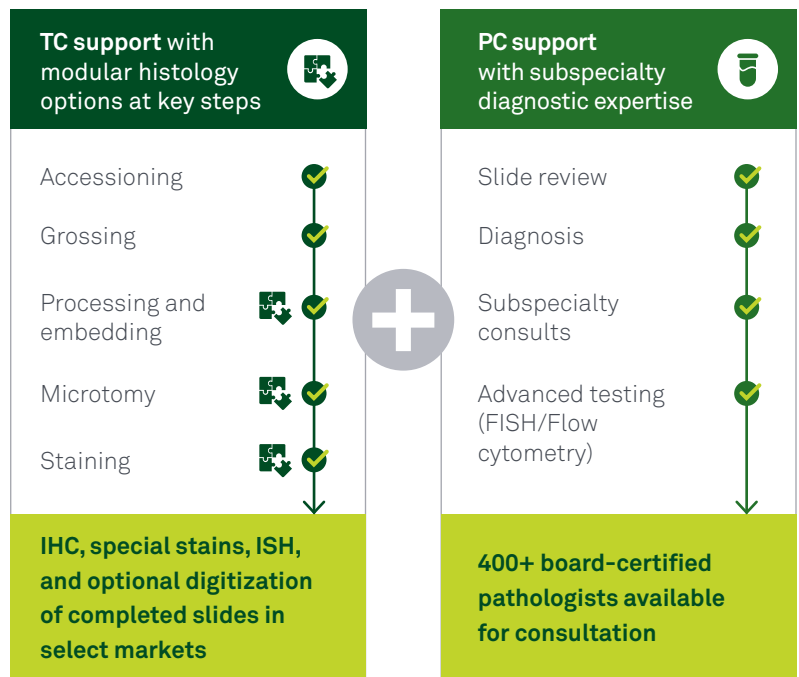

- Support core histology workflows, including slide preparation, staining, and immunohistochemistry (IHC)
- Helps manage volume, reduce strain, and maintain quality
- Leverage modular histopathology support to address internal process bottlenecks

Professional component (PC)

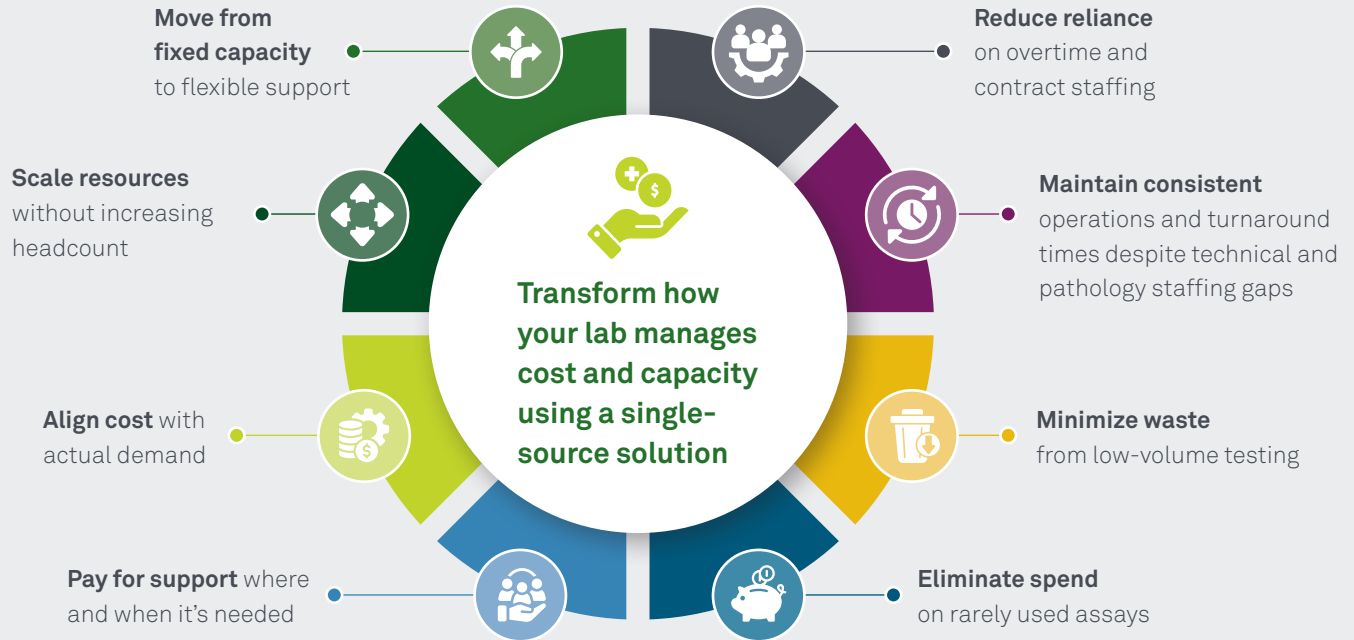

- Access pathologist reads and subspecialty expertise
- Includes advanced diagnostics such as IHC, FISH, flow cytometry, and access to 3,500+ tests

Use TC, PC, or both—based on what your lab needs most

What would change if your lab could scale without expanding your team?

As demand and variability increase, labs need more flexible ways to manage capacity and control costs.

Harness the power of Quest for a more flexible pathology model

Flexible TC and PC support at scale

Choose the level of support you need with modular histology and diagnostic services tailored to your lab

Broad pathology capabilities and subspecialty expertise

Support for IHC, FISH, flow cytometry, and esoteric testing

Nationwide infrastructure, logistics, and payer access

Reliable slide transport, specimen processing, connectivity, and broad payer coverage that helps simplify access and reimbursement

Seamless integration into your workflows

Designed to integrate with your lab information system (LIS), workflows, and processes

Discover where flexible pathology support can make the greatest impact for your lab.
Connect with your Quest representative to explore TC/PC solutions.
