

## Is your clinical trial on the list?

Quest has identified the clinical trials where we have patients matching protocol eligibility.

At Quest Diagnostics, we don't just search for patients—we map them to active protocols using real-world clinical data. This document highlights a selection of current clinical trials where we have already identified highly eligible patient cohorts.

**Request a proposal today:** Let us tell you precisely how many eligible patients Quest can help you recruit for your clinical trials—on or off this list.

| ClinicalTrials.gov ID | Study Name                                                                                                                                                                                            |
|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCT06717698           | A Research Study Comparing How Well Different Doses of the Medicine NNC0519-0130 Can Reduce Kidney Damage in People Living With Chronic Kidney Disease                                                |
| NCT07403669           | Cardiovascular Kidney and Metabolic Health Assessment and Patient Empowerment                                                                                                                         |
| NCT06907147           | SPYRAL GEMINI Pilot Study                                                                                                                                                                             |
| NCT07159282           | A Multicenter, Prospective, Controlled Clinical Trial Evaluating the Efficacy of a Single Layer Placental-based Allograft and Standard of Care in the Management of Nonhealing Diabetic Foot Ulcers   |
| NCT06600724           | Modified Platform Trial Evaluating PpLHACM and SOC Versus SOC Alone in the Treatment of Nonhealing DFUs                                                                                               |
| NCT06976619           | The Effect of Glycemic Control and of GLP-1 Receptor Agonism on Islet GLP-1 in People With Type 1 and Type 2 Diabetes                                                                                 |
| NCT07606066           | A Study to Identify and Characterize Patients With Type 2 Diabetes Mellitus for Possible Participation in Ongoing or Future Type 2 Diabetes Mellitus Clinical Studies                                 |
| NCT06739122           | A Study of Dulaglutide (LY2189265) 3.0 mg and 4.5 mg in Pediatric Participants With Type 2 Diabetes Mellitus (AWARD-PEDS PLUS)                                                                        |
| NCT07228117           | GATEWAY: Safety Evaluation of the MiniMed™ NMX8-AID System in Children and Adults Living With Diabetes                                                                                                |
| NCT07518004           | ROME GS System Study                                                                                                                                                                                  |
| NCT07386340           | Gemini Study: A Prospective, Multicenter Evaluation of Performance and Safety of the Eversense Gemini System With Flash Glucose Measurement Feature                                                   |
| NCT07222917           | A Phase IIb Study to Evaluate the Effect of Dapagliflozin in Combination With Baxdrostat Compared With Baxdrostat on Albuminuria in Participants With Chronic Kidney Disease and High Blood Pressure. |
| NCT07160257           | A Study to Evaluate the Effect of Maridebart Cafraglutide on Insulin Sensitivity and $\beta$ -cell Function in Participants With Type 2 Diabetes Mellitus                                             |
| NCT05055804           | The ELG Analysis of Glucose a Correlational to Blood Glucose Assay                                                                                                                                    |
| NCT06945419           | A Study of LY4086940 in Healthy Participants and Participants With Overweight or Obesity, With or Without Type 2 Diabetes                                                                             |
| NCT02846571           | Pancreatic Islet Transplantation Into the Anterior Chamber of the Eye                                                                                                                                 |

|             |                                                                                                                                                                                                                                             |
|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCT07064473 | EASi-PROTKT™ - A Study to Test Vicadrostat (BI 690517) Taken Together With Empagliflozin in People With Type 2 Diabetes, High Blood Pressure, and Cardiovascular Disease                                                                    |
| NCT07321886 | A Study of Eloralintide (LY3841136) in Participants With Obesity, or Overweight Without Type 2 Diabetes                                                                                                                                     |
| NCT07327489 | Predicting Response to Immunotherapy From Analysis of Live Tumor Biopsies                                                                                                                                                                   |
| NCT07327489 | Predicting Response to Immunotherapy From Analysis of Live Tumor Biopsies                                                                                                                                                                   |
| NCT07351058 | A Clinical Study to Evaluate the Effects of Enicepatide (RO7795068) in Participants With Obesity or Overweight and Type 2 Diabetes                                                                                                          |
| NCT06845202 | A Study to Evaluate ALN-4324 in Overweight to Obese Healthy Volunteers and in Overweight to Obese Patients With T2DM                                                                                                                        |
| NCT06562907 | Study of GS-4571 in Healthy Participants, Nondiabetic Obese Participants, and Nonobese Participants With Type 2 Diabetes Mellitus (T2DM)                                                                                                    |
| NCT07533175 | AMAZE 2: A Research Study Investigating How Well the Medicine NNC0487-0111 Helps People With Excess Body Weight and Type 2 Diabetes Lose Weight                                                                                             |
| NCT07415954 | A Research Study Comparing How Well Different Doses of the Medicine NNC0662-0419 Lower Blood Sugar in People With Type 2 Diabetes                                                                                                           |
| NCT07527650 | Study to Evaluate HM15275 in Subjects With Type 2 Diabetes Mellitus                                                                                                                                                                         |
| NCT06681233 | Feasibility Study of CBCT for IGRT in Cancer Patients                                                                                                                                                                                       |
| NCT05732831 | Safety and Tolerability of TNG462 in Patients With MTAP-deleted Solid Tumors                                                                                                                                                                |
| NCT04787042 | Phase 1a and Phase 2 Study for Safety, Preliminary Efficacy, PK and PD of ST-067                                                                                                                                                            |
| NCT05377996 | A Study of Emiltatug Ledadotin (Emi-Le) in Participants With Solid Tumors                                                                                                                                                                   |
| NCT05086692 | A Beta-only IL-2 ImmunoTherapY Study                                                                                                                                                                                                        |
| NCT06781983 | Safety and Tolerability of IPH4502 in Patients With Advanced Solid Tumors                                                                                                                                                                   |
| NCT07339176 | Intratumoral N17350 in Advanced Solid Tumors                                                                                                                                                                                                |
| NCT06910657 | IDOV-Immune for Advanced Solid Tumors                                                                                                                                                                                                       |
| NCT03452774 | SYNERGY-AI: Artificial Intelligence Based Precision Oncology Clinical Trial Matching and Registry                                                                                                                                           |
| NCT06022029 | A Dose Escalation and Dose Expansion Study of Intratumoral ONM-501 Alone and in Combination With Cemiplimab in Patients With Advanced Solid Tumors and Lymphomas.                                                                           |
| NCT07397338 | Study of RAS(ON) Inhibitors in Combination With Ivonescimab in Patients With Solid Tumors                                                                                                                                                   |
| NCT06778863 | A Study of CLSP-1025 in Adult Patients With Solid Tumors That Harbor the p53 R175H Mutation                                                                                                                                                 |
| NCT07070232 | A Clinical Study to Test if an Investigational Treatment Called BNT326 is Safe and Potentially Beneficial When Used Alone or in Combination With Other Investigational Treatments Such as BNT327, for People With Advanced Malignant Tumors |

|             |                                                                                                                                                                               |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCT07213609 | A Study to Investigate the Safety and Preliminary Efficacy of GSK5460025 Alone or in Combination With Other Anti-cancer Agents in Participants With Solid Tumors              |
| NCT07094204 | A Study to Find a Suitable Dose of ASP5834 in Adults With Solid Tumors                                                                                                        |
| NCT06973564 | JAB-23E73 in Adult Participants With Advanced Solid Tumors With KRAS Alteration                                                                                               |
| NCT05969860 | At-Home Cancer Directed Therapy Versus in Clinic for the Treatment of Patients With Advanced Cancer                                                                           |
| NCT07094113 | AMG 410 Alone and in Combination With Other Agents in Participants With KRAS Altered Advanced or Metastatic Solid Tumors                                                      |
| NCT07223047 | A Study to Evaluate the Safety, Tolerability, and Efficacy of BMS-986523 Alone and in Combination With Anti-Cancer Agents in Participants With Advanced Solid Malignancies    |
| NCT04585750 | The Evaluation of PC14586 in Patients With Advanced Solid Tumors Harboring a TP53 Y220C Mutation (PYNNAACLE)                                                                  |
| NCT06710756 | Lead-212 PSV359 Therapy for Patients With Solid Tumors                                                                                                                        |
| NCT06910657 | IDOV-Immune for Advanced Solid Tumors                                                                                                                                         |
| NCT07327489 | Predicting Response to Immunotherapy From Analysis of Live Tumor Biopsies                                                                                                     |
| NCT07300150 | A Study of PT0511 in Participants With KRAS Mutated or Amplified Advanced Solid Tumors                                                                                        |
| NCT06253871 | A Phase 1/1b Study of IAM1363 in HER2 Cancers                                                                                                                                 |
| NCT07215559 | A Study of Macupatide (LY3532226) and Eloralintide (LY3841136), Alone or in Combination, in Adults With Obesity or Overweight and With Type 2 Diabetes                        |
| NCT07284186 | First-in-Human Study of PLX-61639 in Locally Advanced or Metastatic Solid Tumors                                                                                              |
| NCT07400653 | A Study to Learn About the Study Medicine (PF-08653944) in People With Obesity or Overweight and Type 2 Diabetes (T2D)                                                        |
| NCT04475640 | Cancer Genetic Testing in Ethnic Populations                                                                                                                                  |
| NCT06242470 | A Study of MGC026 in Participants With Advanced Solid Tumors                                                                                                                  |
| NCT06447662 | A Study to Learn About the Study Medicine PF-07934040 When Given Alone or With Other Anti-cancer Therapies in People With Advanced Solid Tumors That Have a Genetic Mutation. |
| NCT07054125 | Continuous Glucose Monitoring, Diabetes Education, and Peer Support for Management of Uncontrolled Type 2 Diabetes                                                            |
| NCT06939413 | Diabetes Management Using Continuous Glucose Monitors and Remote Patient Monitoring in Underserved Populations                                                                |
| NCT05107674 | A Study of NX-1607 in Adults With Advanced Malignancies                                                                                                                       |
| NCT06953089 | DB-1311 in Combination With BNT327 or DB-1305 in Advanced/Metastatic Solid Tumors                                                                                             |
| NCT05107674 | A Study of NX-1607 in Adults With Advanced Malignancies                                                                                                                       |
| NCT07318051 | Sample Collection for Ongoing Research and Product Evaluation Study                                                                                                           |

|             |                                                                                                                                                                     |
|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCT07318051 | Sample Collection for Ongoing Research and Product Evaluation Study                                                                                                 |
| NCT04373564 | Effect on Body Movement and Mental Skills in Patients Who Received Gadolinium-based Contrast Media for Magnetic Resonance Examination Multiple Times Within 5 Years |
| NCT05107674 | A Study of NX-1607 in Adults With Advanced Malignancies                                                                                                             |
| NCT07385547 | Study to Evaluate if Exposure to Drug is Impacted in Participants With Renal Insufficiency                                                                          |
| NCT07503808 | A Study of IDE034 in Adult Participants With Locally Advanced/Metastatic Solid Tumors Types                                                                         |
| NCT06906653 | Population Health Management for KPNC Members With Newly Diagnosed Diabetes: A Randomized Trial of a Proactive and Augmented Initial Care Strategy                  |
| NCT07517198 | Dose Determining Study of EXS74539 (REC-4539) in Participants With Select Solid Tumors                                                                              |
| NCT07189871 | 177Lu-BetaBart in Patients With Relapsed/Refractory, Locally Advanced Inoperable, or Metastatic Solid Tumors                                                        |
| NCT07705334 | A Study of SHY-ONC6, a Novel Proteasome Inhibitor, in Adults With Advanced or Metastatic Solid Tumors                                                               |
| NCT06999187 | A Study of DR-0202 in Patients With Locally Advanced or Metastatic, Relapsed or Refractory Carcinomas                                                               |
| NCT06582017 | Safety, PK and Efficacy of QXL138AM in Patients With Solid Tumors and Multiple Myeloma                                                                              |
| NCT07517198 | Dose Determining Study of EXS74539 (REC-4539) in Participants With Select Solid Tumors                                                                              |
| NCT07114601 | A Study of LY4257496 in Participants With Cancer (OMNIRAY)                                                                                                          |
| NCT07114601 | A Study of LY4257496 in Participants With Cancer (OMNIRAY)                                                                                                          |
| NCT07540572 | A Study to Investigate the Safety, Pharmacokinetics, and Preliminary Efficacy of IDE574 Therapy in Adult Participants With Advanced Solid Tumors                    |
| NCT06465069 | A Study of LY4052031 in Participants With Advanced or Metastatic Urothelial Cancer or Other Solid Tumors                                                            |
| NCT05366881 | cfDNA Assay Prospective Observational Validation for Early Cancer Detection and Minimal Residual Disease                                                            |
| NCT07224763 | Study to Evaluate the Safety and Efficacy of the GGTA1 KO Thymokidney in Patients With ESRD                                                                         |
| NCT05366881 | cfDNA Assay Prospective Observational Validation for Early Cancer Detection and Minimal Residual Disease                                                            |
| NCT07100873 | A Phase 1 Study of ADI-001 in Rheumatoid Arthritis                                                                                                                  |
| NCT06274034 | MUSE-S Headband System for Improving Anxiety and Insomnia Among Breast Cancer Survivors                                                                             |
| NCT05176483 | Study of Zanzalintinib in Combination With Immuno-Oncology Agents in Participants With Solid Tumors                                                                 |
| NCT05366881 | cfDNA Assay Prospective Observational Validation for Early Cancer Detection and Minimal Residual Disease                                                            |
| NCT04802395 | Real World Evidence Clinical Utility Study of KidneyIntelX                                                                                                          |
| NCT07503808 | A Study of IDE034 in Adult Participants With Locally Advanced/Metastatic Solid Tumors Types                                                                         |

|             |                                                                                                                                                                                                                                                                      |
|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCT07304505 | Probiotics in Adults With Rheumatoid Arthritis                                                                                                                                                                                                                       |
| NCT07176390 | A Clinical Study of Tulisokibart (MK-7240) to Treat Rheumatoid Arthritis (RA) (MK-7240-014)                                                                                                                                                                          |
| NCT06916806 | A Study to Investigate Safety, Tolerability, Pharmacokinetics, and Pharmacodynamics of AZD5492 in Adult Participants With Systemic Lupus Erythematosus or Idiopathic Inflammatory Myopathies or Rheumatoid Arthritis.                                                |
| NCT06916806 | A Study to Investigate Safety, Tolerability, Pharmacokinetics, and Pharmacodynamics of AZD5492 in Adult Participants With Systemic Lupus Erythematosus or Idiopathic Inflammatory Myopathies or Rheumatoid Arthritis.                                                |
| NCT05295407 | Performance of Inherited Risk Assessment for Predicting Prostate Cancer From Prostate Biopsy                                                                                                                                                                         |
| NCT06267391 | Safety and Effectiveness of Endoscopic Intestinal Re-Cellularization Therapy in Individuals With Type II Diabetes                                                                                                                                                    |
| NCT06926660 | A Study to Test Whether Vicastrostat in Combination With Empagliflozin Helps People With Chronic Kidney Disease                                                                                                                                                      |
| NCT07024823 | A Study to Investigate Safety, Tolerability, Pharmacokinetics, and Pharmacodynamics of AZD4248 in Healthy Participants and Participants With Chronic Kidney Disease and Type 2 Diabetes and to Assess Home Measurements of Creatinine in a Non Interventional Cohort |
| NCT07189871 | 177Lu-BetaBart in Patients With Relapsed/Refractory, Locally Advanced Inoperable, or Metastatic Solid Tumors                                                                                                                                                         |
| NCT04510129 | A Multicenter Cancer Biospecimen Collection Study                                                                                                                                                                                                                    |
| NCT05059444 | ORACLE: Observation of Residual Cancer With Liquid Biopsy Evaluation                                                                                                                                                                                                 |
| NCT06825715 | Multilevel Intervention for Precision Oncology                                                                                                                                                                                                                       |
| NCT07115043 | A Study to Investigate Safety of AZD6750 in Adult Participants With Select Advanced or Metastatic Solid Tumors                                                                                                                                                       |
| NCT05598879 | Global Cardio Oncology Registry                                                                                                                                                                                                                                      |
| NCT04797039 | MRI-Guided Cryoablation for Focal Native Prostate Cancer                                                                                                                                                                                                             |
| NCT07611110 | AZD2265 Compared With Standard of Care in PSMA-positive Metastatic Castration-resistant Prostate Cancer (VECTRA-01)                                                                                                                                                  |
| NCT04986423 | ZEN003694 and Enzalutamide Versus Enzalutamide Monotherapy in Metastatic Castration-Resistant Prostate Cancer                                                                                                                                                        |
| NCT07073794 | Evaluating In Home Cancer Therapy Versus In Clinic Cancer Therapy in Black Men With Locally Advanced, Biochemically Recurrent and Metastatic Prostate Cancer                                                                                                         |
| NCT03460977 | A Study of Mevrometostat for Treatment of Relapsed/Refractory SCLC, Castration Resistant Prostate Cancer, and Follicular Lymphoma                                                                                                                                    |
| NCT05241236 | MRI/Ultrasound Fusion Guided Laser Ablation of Prostate Cancer                                                                                                                                                                                                       |
| NCT05413850 | Anti-tumour Activity of (177Lu) rhPSMA-10.1 Injection                                                                                                                                                                                                                |
| NCT05848739 | A Phase 1-2 of ST316 With Selected Advanced Unresectable and Metastatic Solid Tumors                                                                                                                                                                                 |

|             |                                                                                                                                                                               |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCT06400472 | A Study of LY4170156 in Participants With Selected Advanced Solid Tumors                                                                                                      |
| NCT07189403 | A Study of DS9051b in Participants With Advanced or Metastatic Adrenocortical Carcinoma and Metastatic Castration-resistant Prostate Cancer                                   |
| NCT06682793 | A Study to Evaluate the Safety and Efficacy of A2B395, an Allogeneic Logic-gated CAR T, in Participants With Solid Tumors That Express EGFR and Have Lost HLA-A*02 Expression |
| NCT07488676 | A Study of ASP546C in Adults With Gastroesophageal Cancer, Pancreatic Cancer or Other Solid Tumors                                                                            |
| NCT07488676 | A Study of ASP546C in Adults With Gastroesophageal Cancer, Pancreatic Cancer or Other Solid Tumors                                                                            |
| NCT05746897 | A First-in-human, Phase I, Open-label, Multicenter Study of NM1F(Anti-PVRIG) in Patients With Advanced Solid Tumors                                                           |
| NCT07019649 | Randomized Pilot Trial of AYUDA Program for Younger Latinx Adults With Type 2 Diabetes                                                                                        |
| NCT07048197 | A Study to Assess Safety, Cellular Kinetics and Exploratory Efficacy of Rapcabtagene Autoleucel in Rheumatoid Arthritis and Sjogren's Disease                                 |
| NCT07521475 | Evaluation of the Fully Closed Loop Omnipod® System in Type 2 Diabetes                                                                                                        |
| NCT06562192 | Phase I Study of [177Lu]Lu-NNS309 in Patients With Pancreatic, Lung, Breast and Colorectal Cancers                                                                            |
| NCT07578571 | A Phase 1 Study of IM-1617 in Participants With Advanced Cancer                                                                                                               |
| NCT06562192 | Phase I Study of [177Lu]Lu-NNS309 in Patients With Pancreatic, Lung, Breast and Colorectal Cancers                                                                            |
| NCT05099770 | Proact: A Study of REACT in Subjects With Type 2 Diabetes Mellitus and Chronic Kidney Disease                                                                                 |
| NCT06475937 | A Study of DM001 in Patients With Advanced Solid Tumors                                                                                                                       |
| NCT07578571 | A Phase 1 Study of IM-1617 in Participants With Advanced Cancer                                                                                                               |
| NCT07186296 | EXoPERT EMERALD Clinical Study                                                                                                                                                |
| NCT06993454 | Acute Exercise and Endogenous Glucose Production in Type 2 Diabetes: Implications for Glycemic Control and Treatment of Hepatic Steatosis                                     |
| NCT07182149 | A Phase 1 Study of NRM-823 in Participants With Locally Advanced or Metastatic Refractory Solid Tumors                                                                        |
| NCT05037825 | The Gut Microbiome and Immune Checkpoint Inhibitor Therapy in Solid Tumors                                                                                                    |
| NCT07218003 | A Phase 1/1b of RND0-564 Single Agent or in Combination With Pembrolizumab in Bladder Cancer and Other Solid Tumors Associated With Nectin-4                                  |
| NCT06586957 | A Study With NKT3964 for Adults With Advanced/Metastatic Solid Tumors                                                                                                         |
| NCT06956690 | A Phase 1/2 Clinical Trial to Assess the Safety, Tolerability, Pharmacokinetics and Preliminary Efficacy of HMBD-501 in Patients With HER3-Expressing Solid Tumors            |
| NCT07287995 | A Study of ASP2998 Given by Itself and Given With Standard Therapies in People With Solid Tumors                                                                              |
| NCT06324357 | Beamion BCGC-1: A Study to Find a Suitable Dose of Zongertinib Used Alone and in Combination With Other Treatments to Test                                                    |

|             |                                                                                                                                                                                                                                        |
|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|             | Whether it Helps People With Different Types of HER2+ Cancer That Has Spread                                                                                                                                                           |
| NCT06330064 | A Study To Evaluate The Efficacy And Safety Of Ifinatamab Deruxtecan (I-DXd) In Subjects With Recurrent Or Metastatic Solid Tumors (IDeate-PanTumor02)                                                                                 |
| NCT07432633 | [18F]FPyQCP PET Imaging of Fibroblast Activation Protein in Selected Oncology Indications                                                                                                                                              |
| NCT04101669 | RESET System Pivotal Trial (Rev F)                                                                                                                                                                                                     |
| NCT07330778 | A Study of CDX-622 in Participants With Mild to Moderate Asthma                                                                                                                                                                        |
| NCT07426380 | A Study of Eloralintide (LY3841136) in Participants With Renal Impairment and in Participants With Normal Renal Function                                                                                                               |
| NCT07318805 | A Study to Learn About the Study Medicine Called PF-08032562 in People With Advanced or Metastatic Solid Tumors                                                                                                                        |
| NCT07432633 | [18F]FPyQCP PET Imaging of Fibroblast Activation Protein in Selected Oncology Indications                                                                                                                                              |
| NCT06932263 | Dose Range Finding Study to Assess Efficacy and Safety of Tozorakimab in Adults With Uncontrolled Asthma on Medium-to-High Dose Inhaled Corticosteroids                                                                                |
| NCT06618287 | A Study to Evaluate the Safety, Tolerability, Drug Levels, and Preliminary Efficacy of BMS-986507 Combinations in Adult Participants With Advanced Solid Tumors                                                                        |
| NCT07260110 | A Longitudinal, Observational Study Comparing Real-World Experiences of Teplizumab-Treated and Untreated Participants With Stage 2 Type 1 Diabetes in the United States                                                                |
| NCT06831838 | A Randomized Controlled Trial (RCT) to Determine the Efficacy of a Multidisciplinary CBT Based Pain Management Program for the Treatment of Aromatase Inhibitor Associated Musculoskeletal Symptoms (AIMSS) in Breast Cancer Survivors |
| NCT07264062 | MetSense Pilot and Feasibility                                                                                                                                                                                                         |
| NCT06966453 | A Study of Disitamab Vedotin in Adults With HER2 Expressing Advanced Breast Cancer                                                                                                                                                     |
| NCT07227168 | A Study of STRO-004 in Adults With Refractory/Recurrent Metastatic Cancer                                                                                                                                                              |
| NCT04703244 | Development of Patient Derived Xenografts (PDX) in Patients With Breast Cancer                                                                                                                                                         |
| NCT05507879 | TRPC6 Characterization to Predict and Prevent Chemotherapy Related Cardiomyopathy and Heart Failure With Breast Cancer                                                                                                                 |
| NCT05417867 | Evaluating the Association Among Changes in Gut Microbiome, Fatigue, and Chemotherapy-Induced Nausea in Early Stage Breast Cancer                                                                                                      |
| NCT06557057 | Impact of Aromatase Inhibitor Therapy on Glucose Homeostasis and Diabetes Risk                                                                                                                                                         |
| NCT07227168 | A Study of STRO-004 in Adults With Refractory/Recurrent Metastatic Cancer                                                                                                                                                              |
| NCT04398628 | ATHN Transcends: A Natural History Study of Non-Neoplastic Hematologic Disorders                                                                                                                                                       |
| NCT06424106 | Effect of Glucagon on Fasting Insulin Secretion and Glucose Metabolism in Subjects Without Type 2 Diabetes                                                                                                                             |
| NCT02701244 | A Registry Study of Breast Microseed Treatment                                                                                                                                                                                         |

|             |                                                                                                                                                                                         |
|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCT04787744 | Veterans Affairs Seamless Phase II/III Randomized Trial of STandard Systemic theRapy With or Without PET-directed Local Therapy for Oligometastatic pRosTate Cancer                     |
| NCT07175285 | A Study in Participants With Active Systemic Lupus Erythematosus With Inadequate Response to Glucocorticoids and $\mu$ 2 Immunosuppressants                                             |
| NCT06975787 | Dose Escalation Study With Bispecific Antibodies in Adult Patients With Lupus Nephritis                                                                                                 |
| NCT07030257 | Study of CP-383 in Patients With Advanced or Metastatic Solid Tumors                                                                                                                    |
| NCT07148128 | Phase 1/2a Study to Assess the Safety, Tolerability, Pharmacokinetics, and Preliminary Efficacy of WEF-001 as Monotherapy in Advanced KRAS-Mutant Solid Tumours.                        |
| NCT07502495 | Phase 2 Trial of Icovamenib in Participants With Type 2 Diabetes Who Are Not Achieving Glycemic Targets                                                                                 |
| NCT07000110 | Anifrolumab Malignancy and Serious Infections Study                                                                                                                                     |
| NCT07169734 | A Study to Investigate ALE.P03 as Monotherapy in Adult Patients With Selected Advanced or Metastatic CLDN1+ Solid Tumors                                                                |
| NCT06026410 | KO-2806 Monotherapy and Combination Therapies in Advanced Solid Tumors                                                                                                                  |
| NCT07406087 | Navigation Intervention for Adolescent and Young Adult Cancer Survivors                                                                                                                 |
| NCT06959277 | Balance4Mobility: Effects of Walkasins Use in Individuals With Peripheral Neuropathy and Balance Problems                                                                               |
| NCT07409181 | A Study to Test Whether Different Doses of BI 3000202 Help People With Systemic Lupus Erythematosus (SLE)                                                                               |
| NCT06218914 | Phase 1 Study to Investigate TCRTs KRAS Mutation in Unresectable, Advanced, and/or Metastatic Solid Tumors                                                                              |
| NCT05433142 | Study of XmAb®819 in Subjects With Advanced Clear Cell Renal Cell Carcinoma                                                                                                             |
| NCT06917079 | BBO-11818 in Adult Subjects With KRAS Mutant Cancer                                                                                                                                     |
| NCT06917079 | BBO-11818 in Adult Subjects With KRAS Mutant Cancer                                                                                                                                     |
| NCT07266090 | A Study to Evaluate the Safety,Tolerability,Pharmacokinetics and Pharmacodynamics of Cenerimod in Adult Chinese Participants With Moderate-to-severe Systemic Lupus Erythematosus (SLE) |
| NCT06723236 | A Study of MGC028 in Participants With Advanced Solid Tumors                                                                                                                            |
| NCT07127874 | A Study of PHN-012 in Patients With Advanced Solid Tumors                                                                                                                               |
| NCT07107230 | A Study of JNJ-95437446 in Participants With Advanced-Stage Solid Tumors                                                                                                                |
| NCT06539169 | FLOWER: Following Longitudinal Outcomes With Epidemiology for Rare Diseases                                                                                                             |
| NCT07458347 | A Phase 1 Dose-escalation Trial of KST-6051 in Participants With Advanced Solid Tumors With Kirsten Rat Sarcoma Viral Oncogene Homolog (KRAS) Mutation                                  |
| NCT07458347 | A Phase 1 Dose-escalation Trial of KST-6051 in Participants With Advanced Solid Tumors With Kirsten Rat Sarcoma Viral Oncogene Homolog (KRAS) Mutation                                  |

|             |                                                                                                                                                                                                                                   |
|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCT06539169 | FLOWER: Following Longitudinal Outcomes With Epidemiology for Rare Diseases                                                                                                                                                       |
| NCT01511393 | An Active Surveillance Program for Cases of Medullary Thyroid Carcinoma (MTC)                                                                                                                                                     |
| NCT04995198 | PROMISE Registry: A Prostate Cancer Registry of Outcomes and Germline Mutations for Improved Survival and Treatment Effectiveness                                                                                                 |
| NCT04421820 | BOLD-100 in Combination With FOLFOX for the Treatment of Advanced Solid Tumours                                                                                                                                                   |
| NCT07085091 | A First in Human Study of ALX2004 With Advanced or Metastatic Selected Solid Tumors                                                                                                                                               |
| NCT06730750 | A Study of BMS-986490 With or Without Bevacizumab in Advanced Solid Tumors                                                                                                                                                        |
| NCT06730750 | A Study of BMS-986490 With or Without Bevacizumab in Advanced Solid Tumors                                                                                                                                                        |
| NCT06953089 | DB-1311 in Combination With BNT327 or DB-1305 in Advanced/Metastatic Solid Tumors                                                                                                                                                 |
| NCT07296484 | Trial Against INtractable Type 2 Diabetes (CAPTAIN-T2D)                                                                                                                                                                           |
| NCT07011043 | A Phase 1b Study of Budoprutug in Systemic Lupus Erythematosus (SLE)                                                                                                                                                              |
| NCT04291105 | Phase 2 Trial of Voyager V1 in Combination With Cemiplimab in Cancer Patients                                                                                                                                                     |
| NCT07355270 | A U.S. Pilot Human Investigation of RadiofrEquency Vapor Ablation System to Evaluate Safety, TOleRability, and Effectiveness for Proximal Intestinal Mucosal Ablation in Patients With Type 2 Diabetes Mellitus (RESTORE-1 Study) |
| NCT07213674 | A Study of Xaluritamig Plus Abiraterone Versus Investigator's Choice in Participants With Chemotherapy-naïve Metastatic Castration-resistant Prostate Cancer                                                                      |
| NCT06882746 | A Study to Test Different Doses of BI 765049 in People With Advanced Cancer of the Colon, Rectum, Stomach, or Pancreas                                                                                                            |
| NCT07146854 | EndoForce Post Approval Study                                                                                                                                                                                                     |
| NCT07277413 | A Study of IDE892 as Monotherapy and Combination in MTAP-deleted Advanced Solid Tumors                                                                                                                                            |
| NCT04020575 | Autologous huMNC2-CAR44 or huMNC2-CAR22 T Cells for Breast Cancer Targeting Cleaved Form of MUC1 (MUC1*)                                                                                                                          |
| NCT07089121 | Descartes-08 for Children, Adolescents, and Young Adults With Autoimmune Disorders                                                                                                                                                |
| NCT07164313 | A Study of ZW251 in Participants With Advanced Solid Tumors                                                                                                                                                                       |
| NCT04678648 | A Trial of RSC-1255 for Treatment of Patients With Advanced Malignancies                                                                                                                                                          |
| NCT07444814 | Study Evaluating the Safety and Efficacy of HWK-007, a PTK7-directed Antibody Drug Conjugate in Participants With Advanced Solid Tumors                                                                                           |
| NCT06613568 | Moda-flx Hemodialysis System™ Under Professional Care Settings by Trained Individuals and At Home by Participants                                                                                                                 |
| NCT05919264 | FOG-001 in Locally Advanced or Metastatic Solid Tumors                                                                                                                                                                            |
| NCT07011576 | A Study of Fruquintinib Plus FOLFIRI as Second-Line Treatment for Participants With Metastatic Colorectal Cancer (mCRC)                                                                                                           |

|             |                                                                                                                                                                                                                                              |
|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCT06242470 | A Study of MGC026 in Participants With Advanced Solid Tumors                                                                                                                                                                                 |
| NCT07544589 | A Phase 1 Study Evaluating DISP-10 in Participants With Advanced Gastrointestinal Cancers                                                                                                                                                    |
| NCT04503265 | A Trial of AMXI-5001 for Treatment in Patients With Advanced Malignancies                                                                                                                                                                    |
| NCT07229313 | A Study of KIVU-107 in Participants With Locally Advanced or Metastatic Solid Tumors                                                                                                                                                         |
| NCT05355701 | A Study to Learn About the Study Medicine Called PF-07799933 in People With Advanced Solid Tumors With BRAF Alterations.                                                                                                                     |
| NCT05780034 | A Study of AC676 for the Treatment of Relapsed/Refractory B-Cell Malignancies                                                                                                                                                                |
| NCT06778863 | A Study of CLSP-1025 in Adult Patients With Solid Tumors That Harbor the p53 R175H Mutation                                                                                                                                                  |
| NCT05006716 | A Dose-Escalation and Expansion Study of BGB-16673 in Participants With B-Cell Malignancies                                                                                                                                                  |
| NCT06774963 | A Phase 1 Study of LNCB74 in Advanced Solid Tumors                                                                                                                                                                                           |
| NCT06270706 | A Phase 1 Study of PLN-101095 in Adults With Advanced or Metastatic Solid Tumors                                                                                                                                                             |
| NCT05487170 | A Study of RNK05047 in Subjects With Advanced Solid Tumors/Diffuse Large B-cell Lymphoma (CHAMP-1)                                                                                                                                           |
| NCT06106269 | Outcomes and Quality of Life Following Rectal Artery Embolization for Bleeding Internal Hemorrhoids                                                                                                                                          |
| NCT05131022 | A Study of NX-5948 in Adults With Relapsed/Refractory B-cell Malignancies                                                                                                                                                                    |
| NCT06948448 | A Study to Evaluate the Safety and Efficacy of Two Dose Levels of ONO-4578 With Opdivo®, in Combination With mFOLFOX6 and Bevacizumab Versus Standard of Care in Participants With Non-MSI-H/dMMR, PD-L1 Positive Advanced Colorectal Cancer |
| NCT07187479 | Outcomes of Physiologic Insulin Resensitization (PIR) in Patients With Chronic Kidney Disease and Type 2 Diabetes Mellitus                                                                                                                   |
| NCT07519655 | Phase 1 Study of PF-08046033 in Advanced Solid Tumors                                                                                                                                                                                        |
| NCT06983054 | DiEtary Sodium Intake Effects on Ertugliflozin-induced Changes in GFR, reNal Oxygenation and Systemic Hemodynamics: the DESIGN Study, a Randomized, Placebo-controlled, Cross-over Study With Ertugliflozin in People With Type 2 Diabetes   |
| NCT03715933 | Phase 1 Study of INBRX-109 in Subjects With Locally Advanced or Metastatic Solid Tumors Including Sarcomas                                                                                                                                   |
| NCT04485013 | TTX-080 HLA-G Antagonist in Subjects With Advanced Cancers                                                                                                                                                                                   |
| NCT04485013 | TTX-080 HLA-G Antagonist in Subjects With Advanced Cancers                                                                                                                                                                                   |
| NCT06824064 | Evaluation of RBS2418 in Patients With Advanced, Metastatic, and Progressive Colorectal Cancer                                                                                                                                               |
| NCT07559825 | Early-Onset Colorectal Cancer Patients Too Young for Screening                                                                                                                                                                               |
| NCT05234177 | Tempus CRC Surveillance Study: A ctDNA Biomarker Profiling Study of Patients With CRC Using NGS Assays                                                                                                                                       |
| NCT06750094 | A Study of Amivantamab and FOLFIRI Versus Cetuximab/Bevacizumab and FOLFIRI in Participants With KRAS/NRAS and BRAF Wild-type Colorectal Cancer Who Have Previously Received Chemotherapy                                                    |

|             |                                                                                                                                                                                                                                                                                                           |
|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCT07023289 | A Study to Assess Adverse Events and Change in Disease Activity in Adult Participants Receiving Intravenously Infused Telisotuzumab Adizutecan Alone or With Standard of Care in Participants With Post Adjuvant Circulating Tumor DNA Positive Colorectal Cancer and No Radiographic Evidence of Disease |
| NCT05379595 | A Study of Amivantamab Monotherapy and in Addition to Standard-of-Care Chemotherapy in Participants With Advanced or Metastatic Colorectal Cancer                                                                                                                                                         |
| NCT06997497 | A Clinical Study of Caldasib (MK-1084) With Targeted Therapy and Chemotherapy in People With Colorectal Cancer (MK-1084-012/KANDLELIT-012)                                                                                                                                                                |
| NCT06607458 | Evaluation of the Safety and Efficacy of Treatment w/High Dose Melphalan Given Directly Into the Liver Followed by Treatment w/Approved Cancer Treatment or Approved Cancer Treatment Alone in Patients w/ Metastatic Colorectal Cancer w/Liver Dominant Disease                                          |
| NCT05512390 | A Study to Assess the Adverse Events, Change in Disease Activity, and How Intravenously Infused ABBV-319 Moves Through the Bodies of Adult Participants With Relapsed or Refractory (R/R) Diffuse Large B-cell Lymphoma (DLBCL), Follicular Lymphoma (FL), or Chronic Lymphocytic Leukemia (CLL)          |
| NCT07337590 | Anastomotic Safety and Surveillance Using Real-time Enhanced Sensing Using xBar                                                                                                                                                                                                                           |
| NCT06004245 | A Study to Evaluate the Safety, Pharmacokinetics, and Anti-Tumor Activity of VVD-133214 as Monotherapy and in Combination in Participants With Advanced Solid Tumors                                                                                                                                      |
| NCT07079631 | A Clinical Study to Test if an Investigational Treatment Called BNT314 When Used in Combination With Another Investigational Treatment BNT327 and Chemotherapy, is Beneficial and Safe for Patients With Advanced Colorectal Cancer                                                                       |
| NCT04991948 | Study of Pembrolizumab Treatment After CYAD-101 With FOLFOX Preconditioning in Metastatic Colorectal Cancer                                                                                                                                                                                               |
| NCT03692429 | alloSHRINK - Standard cHemotherapy Regimen and Immunotherapy With Allogeneic NKG2D-based CYAD-101 Chimeric Antigen Receptor T-cells                                                                                                                                                                       |
| NCT07416552 | A Study to Investigate CEA-PRIT 2.0 in Participants With Metastatic Colorectal Cancer (mCRC)                                                                                                                                                                                                              |
| NCT07116668 | SafeHeal Colovac Anastomosis Protection Device Evaluation Pivotal Study                                                                                                                                                                                                                                   |
| NCT05253651 | A Study of Tucatinib With Trastuzumab and mFOLFOX6 Versus Standard of Care Treatment in First-line HER2+ Metastatic Colorectal Cancer                                                                                                                                                                     |
| NCT06695845 | A Phase 2 Study of Zanidatamab in Patients With HER2-expressing Tumors                                                                                                                                                                                                                                    |
| NCT05477563 | Evaluation of Efficacy and Safety of a Single Dose of CTX001 in Participants With Transfusion-Dependent $\beta$ -Thalassemia and Severe Sickle Cell Disease                                                                                                                                               |
| NCT06239194 | Dose Escalation and Dose Expansion Study of MDX2001 in Patients With Advanced Solid Tumors                                                                                                                                                                                                                |
| NCT06239194 | Dose Escalation and Dose Expansion Study of MDX2001 in Patients With Advanced Solid Tumors                                                                                                                                                                                                                |
| NCT07563738 | A 2-part Phase 1/2 Open-label Trial on ODM-212                                                                                                                                                                                                                                                            |
| NCT06748222 | E-Mindfulness Approaches for Living After Breast Cancer                                                                                                                                                                                                                                                   |

|             |                                                                                                                                                                                                                  |
|-------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCT05477563 | Evaluation of Efficacy and Safety of a Single Dose of CTX001 in Participants With Transfusion-Dependent $\beta$ -Thalassemia and Severe Sickle Cell Disease                                                      |
| NCT06858813 | A Study to Assess Adverse Events and Change in Disease Activity of Intravenously (IV) Infused ABBV-324 in Adult Participants With Hepatocellular Cancer (HCC) or Squamous-Cell Non-Small Cell Lung Cancer (LUSC) |
| NCT06922591 | Study to Evaluate the Safety, Tolerability & Efficacy of TNG462 in Combination in PDAC & NSCLC Patients                                                                                                          |
| NCT07462377 | A Phase 1 Study of EPI-326 in EGFR-mutant NSCLC and HNSCC                                                                                                                                                        |
| NCT07284433 | Study of Allo-QuadCAR01-T, an Allogeneic CAR-T Targeting CD19/CD20, in Patients With Relapsed or Refractory B-Cell Malignancies                                                                                  |
| NCT06663319 | A Study of JNJ-89402638 for Metastatic Colorectal and Gastric Cancers                                                                                                                                            |
| NCT07195916 | A Study to Evaluate INCA036873 in Participants With Advanced Solid Tumors and Hematological Malignancies                                                                                                         |
| NCT07011745 | A Phase 3 Study to Evaluate the Safety and Efficacy of KarXT + KarX-EC for the Treatment of Agitation Associated With Alzheimer's Disease (ADAGIO-2)                                                             |
| NCT06878560 | Study to Evaluate the Safety and Efficacy of the 10 GE Xenokidney in Patients With ESRD                                                                                                                          |
| NCT05643235 | Implanted Loop Recorders for Detection and Management of Arrhythmia With Bruton Tyrosine Kinase Inhibitors                                                                                                       |
| NCT04830137 | A Study of NX-2127 in Adults With Relapsed/Refractory B-cell Malignancies                                                                                                                                        |
| NCT06533579 | Gene Therapy for CD19-Positive Hematologic Malignancies (SENTRY-CD19)                                                                                                                                            |
| NCT03175224 | APL-101 Study of Subjects With NSCLC With c-Met EXON 14 Skip Mutations and c-Met Dysregulation Advanced Solid Tumors                                                                                             |
| NCT06964087 | Pharmacokinetic and Early Efficacy of OPT101 in Patients With Type 1 Diabetes Mellitus                                                                                                                           |
| NCT05855200 | Study of Perioperative Dostarlimab in Participants With Untreated T4N0 or Stage III dMMR/MSI-H Resectable Colon Cancer                                                                                           |
| NCT06934538 | First-in-human Trial of STC-1010, an Immunotherapy, in Patients With Unresectable Locally Advanced or Metastatic Colorectal Cancer                                                                               |
| NCT07226843 | A Study of LY4584180 in Adult Participants With Previously Treated Blood Cancers                                                                                                                                 |
| NCT06528301 | A Phase 1 Study of UB-VV111 With and Without Rapamycin in Relapsed/Refractory CD19+ B-cell Malignancies                                                                                                          |
| NCT07229313 | A Study of KIVU-107 in Participants With Locally Advanced or Metastatic Solid Tumors                                                                                                                             |
| NCT06544265 | SynKIR-310 for Relapsed/Refractory B-NHL                                                                                                                                                                         |
| NCT06552169 | REgulatory T Cell Therapy to Achieve Immunosuppression REduction                                                                                                                                                 |
| NCT07365319 | A Safety and Efficacy Study of EIK1001 in Combination With Pembrolizumab and Chemotherapy in Participants With Stage 4 Non-Small Cell Lung Cancer.                                                               |
| NCT07491497 | A Phase 1/2 Study of TRI-611 in ALK-Positive NSCLC                                                                                                                                                               |

|             |                                                                                                                                                                                                                                                                                          |
|-------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCT06892548 | A Clinical Study to Investigate the Efficacy and Safety of an Investigational Combination Therapy With BNT324 and BNT327 in Patients With Advanced Lung Cancer                                                                                                                           |
| NCT07028489 | Prospective External Control Cohort In Patients With Newly Diagnosed Advanced or Metastatic EGFR Mutant Non-Small Cell Lung Cancer                                                                                                                                                       |
| NCT07100080 | Study of Izalontamab Brengitecan (BMS-986507) Versus Platinum-Pemetrexed for EGFR-mutated Non-small Cell Lung Cancer After Failure of EGFR TKI Therapy (IZABRIGHT-Lung01)                                                                                                                |
| NCT06841055 | Safety and Preliminary Efficacy of Pumitamig (BNT327), an Investigational Therapy for Patients With Non-small Cell Lung Cancer in Combination With Chemotherapy as First-line or Second-line Treatment                                                                                   |
| NCT07291037 | Phase III Study of Datopotamab Deruxtecan Versus Docetaxel in Previously Treated TROP2-positive Advanced or Metastatic Non-squamous NSCLC Without Actionable Genomic Alterations                                                                                                         |
| NCT07155187 | A Study to Assess Adverse Events and Change in Disease Activity of Intravenous (IV) Telisotuzumab Adizutecan Compared to Standard of Care in Adult Participants With Locally Advanced or Metastatic EGFR-Mutated Non-Squamous Non-Small Cell Lung Cancer                                 |
| NCT07195695 | Beamion LUNG-3: Adjuvant Zongertinib vs Standard Treatment in People With Completely Resected Stage II-IIIB NSCLC Harboring Activating HER2 TKD Mutations                                                                                                                                |
| NCT07005102 | A Study to Assess Adverse Events, Change in Disease Activity of Intravenous Telisotuzumab Adizutecan in Combination With Osimertinib as First-Line Treatment in Adult Participants With Locally Advanced Unresectable or Metastatic EGFR-Mutated Non-Squamous Non-Small Cell Lung Cancer |
| NCT06686771 | Radiotherapy to Block Oligoprogression In Metastatic Non-Small-Cell Lung Cancer                                                                                                                                                                                                          |
| NCT07222566 | Symbiotic-Lung-01 : A Study to Learn About the Study Medicine Called PF-08634404 in Combination With Chemotherapy in Adult Participants With Locally Advanced or Metastatic Non-Small Cell Lung Cancer                                                                                   |
| NCT06868485 | A Study to Assess the Efficacy of WSD0922-FU in Patients With C797S+ Advanced Non-small Cell Lung Cancer                                                                                                                                                                                 |
| NCT06905197 | A Multinational Study Assessing an Oral EGFR Inhibitor, DZD6008 in Patients Who Have Advanced NSCLC With EGFR Mutations (TIAN-SHAN1)                                                                                                                                                     |
| NCT07098988 | Trial Investigating Visugromab in Combination With Immunochemotherapy in 1L Treatment of Participants With Metastatic NSCLC                                                                                                                                                              |
| NCT07439094 | A First-in-Human Study of CKD-703 in Advanced Solid Tumors and Non-Small Cell Lung Cancer                                                                                                                                                                                                |
| NCT07111520 | A Clinical Trial to Test if an Investigational Combination Therapy With BNT326 and BNT327 is Safe and Potentially Beneficial for People With Advanced Non-small Cell Lung Cancer (NSCLC)                                                                                                 |
| NCT07513376 | A Clinical Trial of Adjuvant Intismeran (V940) With or Without Pembrolizumab Coformulated With Berahyaluronidase Alfa (MK-3475A) in High-Risk Stage I Non-Small Cell Lung Cancer (V940-014)                                                                                              |
| NCT06881784 | Study of Daraxonrasib (RMC-6236) in Patients With RAS Mutated NSCLC (RASolve 301)                                                                                                                                                                                                        |
| NCT07288177 | Study to Assess the Efficacy and Safety of Rina-S in Participants With Non-small Cell Lung Cancer                                                                                                                                                                                        |

|             |                                                                                                                                                                                                                                                                                                            |
|-------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCT06855771 | A Study of Navlimetostat (BMS-986504) in Participants With Pre-treated Advanced or Metastatic Non-small Cell Lung Cancer (NSCLC) With Homozygous MTAP Deletion (MountainTAP-9)                                                                                                                             |
| NCT07063745 | A Study to Compare the Combination of Navlimetostat (BMS-986504) With Pembrolizumab and Chemotherapy Versus Placebo Plus Pembrolizumab and Chemotherapy in First-line Metastatic Non-small Cell Lung Cancer Participants With Homozygous MTAP Deletion                                                     |
| NCT07098338 | A Study of Novel Combinations in Non-Small Cell Lung Cancer (NSCLC)                                                                                                                                                                                                                                        |
| NCT07361497 | A Study to Evaluate Pumitamig Versus Durvalumab Following Concurrent Chemoradiation Therapy in Participants With Unresectable Stage III Non-small Cell Lung Cancer (NSCLC) (ROSETTA Lung-201)                                                                                                              |
| NCT05142189 | Clinical Trial Evaluating the Safety, Tolerability and Preliminary Efficacy of BNT116 Alone and in Combinations in Patients With Advanced Non-small Cell Lung Cancer                                                                                                                                       |
| NCT07246863 | Trial Investigating Visugromab and Nivolumab With or Without Docetaxel in 2L Treatment of Participants With Metastatic NSCLC                                                                                                                                                                               |
| NCT06772623 | Study to Evaluate Adverse Events and Efficacy of Intravenous (IV) Telisotuzumab Adizutecan in Combination With a PD-1 Immune Checkpoint Inhibitor in Adult Participants With Advanced or Metastatic Non-Squamous NSCLC With No Prior Treatment for Advanced Disease, and No Actionable Genomic Alterations |
| NCT07221474 | A Study of Intismeran Autogene (V940)/Placebo + Pembrolizumab and Chemotherapy in Metastatic Squamous Non-Small Cell Lung Cancer (V940-013)                                                                                                                                                                |
| NCT06793215 | A Study Evaluating the Efficacy and Safety of Divarasib and Pembrolizumab Versus Pembrolizumab and Pemetrexed and Carboplatin or Cisplatin in Participants With Previously Untreated, KRAS G12C-Mutated, Advanced or Metastatic Non-Squamous Non-Small Cell Lung Cancer                                    |
| NCT06780085 | A Study of Investigational Agents in Participants With Previously Treated Stage IV Nonsquamous Non-small Cell Lung Cancer (NSCLC) (MK-3475-01H/KEYMAKER-U01)                                                                                                                                               |
| NCT07286149 | A Clinical Study of MK-1084 With Other Treatments for Non-small Cell Lung Cancer (MK-3475-01F)                                                                                                                                                                                                             |
| NCT06788912 | Pembrolizumab (MK-3475) Plus Investigational Agents in Resectable Non-small Cell Lung Cancer (NSCLC) (MK-3475-01E/KEYMAKER-U01)                                                                                                                                                                            |
| NCT07190248 | A Clinical Study of Calderasib (MK-1084) and Other Treatments for Participants With Non-Small Cell Lung Cancer (MK-1084-007/KANDLELIT-007)                                                                                                                                                                 |
| NCT06731907 | A Study of Pembrolizumab With or Without Chemotherapy in Combination With Additional Treatments for Advanced Non-Small Cell Lung Cancer (NSCLC) (MK-3475-01G/KEYMAKER U01)                                                                                                                                 |
| NCT07140016 | A Study of Gilteritinib in Adults With Advanced ALK-positive Non-small Cell Lung Cancer (NSCLC)                                                                                                                                                                                                            |
| NCT06907615 | A Phase II Clinical Study to Evaluate HLX43 in Subjects With Advanced Non-small Cell Lung Cancer (NSCLC)                                                                                                                                                                                                   |
| NCT07361510 | A Study to Evaluate the Efficacy of Pumitamig Versus Pembrolizumab in Participants With Previously Untreated Advanced Non-Small Cell Lung Cancer and PD-L1 ≥ 50%. (ROSETTA Lung-202)                                                                                                                       |

|             |                                                                                                                                                                                                                                            |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCT07252739 | KEYMAKER-U01 Substudy 01J: A Study of Pembrolizumab Plus MK-1084 in Participants With Non-Small Cell Lung Cancer (NSCLC) With Kirsten Rat Sarcoma Viral Oncogene Homolog (KRAS) G12C Mutations (MK-3475-01J/KEYMAKER-U01J)                 |
| NCT06996782 | A Platform Study in Non-Small Cell Lung Cancer (NSCLC)                                                                                                                                                                                     |
| NCT06568939 | A Study to Assess Adverse Events and How Intravenously (IV) Infused Telisotuzumab Vedotin (ABBV-399) Moves Through the Body as a Monotherapy in Adult Participants With Previously Treated Non-Squamous Non-Small Cell Lung Cancer (NSCLC) |
| NCT06875310 | A Study of Adagrasib Plus Pembrolizumab Plus Chemotherapy vs. Placebo Plus Pembrolizumab Plus Chemotherapy in Participants With Previously Untreated Non-squamous Non-small Cell Lung Cancer With KRAS G12C Mutation (KRYSTAL-4)           |
| NCT06899126 | Study of Trastuzumab Deruxtecan, Pembrolizumab, and Platinum-based Chemotherapy in First-line HER2 Overexpressing Non-small Cell Lung Cancer                                                                                               |
| NCT06765109 | Neladalkib (NVL-655) for TKI-naïve Patients With Advanced ALK-Positive NSCLC                                                                                                                                                               |
| NCT07154706 | Phase 3 Study of Talrectinib vs Placebo as an Adjuvant Therapy in ROS1 Positive NSCLC (TRUST-IV)                                                                                                                                           |
| NCT04256317 | A Multi-phase Study of ASTX030 (Azacitidine and Cedazuridine) in Myeloid Neoplasm Alone or in Combination With Venetoclax in AML (AZTOUND Study)                                                                                           |
| NCT06399757 | A Study to Investigate APL-5125 in Adults With Advanced Solid Tumors                                                                                                                                                                       |
| NCT06667687 | Study to Evaluate Adverse Events, Change in Disease Activity, and How Intravenously Infused ABBV-291 Moves Through the Body in Adult Participants With Non-Hodgkin's Lymphoma                                                              |
| NCT06399757 | A Study to Investigate APL-5125 in Adults With Advanced Solid Tumors                                                                                                                                                                       |
| NCT03659448 | Performance of SGM-101 for the Delineation of Primary and Recurrent Tumor and Metastases in Patients Undergoing Surgery for Colorectal Cancer                                                                                              |
| NCT07399678 | Study of ALV-100 to Assess Safety, Tolerability, and PK/PD in Overweight/Obese Participants With or Without T2D                                                                                                                            |
| NCT05255354 | Optimizing ctDNA-based MRD Assessment in DLBCL, MCL, and FL Patients Undergoing CAR Therapy                                                                                                                                                |
| NCT05283720 | A Study to Evaluate Adverse Events and Change in Disease Activity of Subcutaneous (SC) Epcoritamab in Combination With Oral and Intravenous Anti-Neoplastic Agents in Adult Participants With Non-Hodgkin Lymphoma                         |
| NCT06067139 | Sleep for Health Study on the Effects of Cognitive Behavioral Therapy for Insomnia on Diabetes Risk                                                                                                                                        |
| NCT07460752 | Evaluation of Alternative Site Goserelin Acetate Injection for Ovarian Function Suppression (OFS) in Local and Locally Advanced Premenopausal Hormone Receptor Positive Breast Cancer Patients                                             |
| NCT04329728 | The OPAL Study: AVM0703 for Treatment of Lymphoid Malignancies                                                                                                                                                                             |
| NCT05421663 | A Study of JNJ-90014496 in Participants With B-Cell Non-Hodgkin Lymphoma                                                                                                                                                                   |
| NCT06488365 | In Vivo Liquid Biopsy of Melanoma (Cytophone)                                                                                                                                                                                              |

|             |                                                                                                                                                                                                                          |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCT06743126 | SUPRAME-ACTengine® IMA203 vs. Investigator's Choice of Treatment in Previously Treated, Unresectable or Metastatic Cutaneous Melanoma                                                                                    |
| NCT07104565 | Study to Assess the Safety and Tolerability of Tafasitamab in Adult Participants With Primary Autoimmune Blood Cell Disorders                                                                                            |
| NCT06697301 | Safety and Efficacy of EIK1001 in Combo With Pembro Versus Placebo and Pembro as First-Line Therapy in Patients With Advanced Melanoma.                                                                                  |
| NCT05660395 | A Study to Evaluate the Pharmacokinetics and Safety of Loncastuximab Tesirine in Participants With Relapsed or Refractory Diffuse Large B-cell Lymphoma or High-grade B-cell Lymphoma With Hepatic Impairment (LOTIS-10) |
| NCT07276789 | Efficacy and Safety of a Single Dose of LS301-IT for Fluorescence Intraoperative Molecular Imaging (IMI) for Patients Undergoing Lung Cancer Resection for Non Small Cell Lung Cancer                                    |
| NCT07217301 | IBI363 vs Docetaxel in Patients With Advanced Squamous Lung Cancer After Standard Treatments Have Failed                                                                                                                 |
| NCT05365659 | IKS03 in Patients With Advanced B Cell Non-Hodgkin Lymphomas                                                                                                                                                             |
| NCT06464315 | Functional Substrate-Only Guided VT Ablation                                                                                                                                                                             |
| NCT06799065 | First-in-Human Study of ATX-295, an Oral Inhibitor of KIF18A, in Patients With Advanced or Metastatic Solid Tumors, Including Ovarian Cancer                                                                             |
| NCT04628585 | Long-term Follow-up of Subjects with Sickle Cell Disease Treated with Ex Vivo Gene Therapy                                                                                                                               |
| NCT07224360 | Safety of Anumigilimab (CSL324) in Adults With Sickle Cell Disease (SCD)                                                                                                                                                 |
| NCT04628585 | Long-term Follow-up of Subjects with Sickle Cell Disease Treated with Ex Vivo Gene Therapy                                                                                                                               |
| NCT07224360 | Safety of Anumigilimab (CSL324) in Adults With Sickle Cell Disease (SCD)                                                                                                                                                 |
| NCT06546670 | A Phase I/II Study of ITU512 in Healthy Participants and Patients With Sickle Cell Disease                                                                                                                               |
| NCT06439082 | A Study to Investigate the Efficacy and Safety of Crizanlizumab (5 mg/kg) Compared With Placebo in Adolescent and Adult Sickle Cell Disease Patients Who Experience Frequent Vaso-Occlusive Crises (SPARKLE)             |
| NCT06997029 | A Phase 1 Study of BMS-986500 as Monotherapy or Combination Therapy in Advanced Solid Tumors                                                                                                                             |
| NCT06699849 | Safety, Efficacy, and Pharmacokinetics of CSL889 in Adults and Adolescents With Sickle Cell Disease During Vaso-Occlusive Crisis                                                                                         |
| NCT06699849 | Safety, Efficacy, and Pharmacokinetics of CSL889 in Adults and Adolescents With Sickle Cell Disease During Vaso-Occlusive Crisis                                                                                         |
| NCT06395103 | Substudy 01A: Zilovetamab Vedotin in Pediatric and Young Adult Participants With Hematologic Malignancies or Solid Tumors (MK-9999-01A/LIGHTBEAM-U01)                                                                    |
| NCT06975865 | The Efficacy and Safety of Rilzabrutinib in Participants Aged 10 to 65 Years With Sickle-cell Disease                                                                                                                    |
| NCT04184973 | Efficacy and Safety of the CG-100 Intraluminal Bypass Device                                                                                                                                                             |

|             |                                                                                                                                                                                                                                                                                                 |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCT06745908 | Clinical Trial of N-803 Plus Tislelizumab or Prior Failed Immune Checkpoint Inhibitor and Docetaxel Versus Docetaxel Monotherapy in Participants With Advanced or Metastatic Non-Small Cell Lung Cancer Who Have Acquired Resistance to Immune Checkpoint In                                    |
| NCT06847867 | A Study of Mometotinib in Participants With Low-risk Myelodysplastic Syndrome                                                                                                                                                                                                                   |
| NCT07023731 | A Study to Evaluate ARV-806 in Adults With Advanced Cancer That Has the KRAS G12D Mutation                                                                                                                                                                                                      |
| NCT06965166 | Contrast-Enhanced Photon-Counting Detector CT (PCD-CT) for the Local Staging of Rectal Cancer                                                                                                                                                                                                   |
| NCT04888975 | A Non-randomized, Open-Label Study to Evaluate the Safety and Effectiveness of the Dayspring Technology for Patients With Breast Cancer Related Lymphedema (BCRL) After Lymphatic Surgery                                                                                                       |
| NCT04245683 | Feasibility of Non-Operative Management of Rectal Cancer in a Rural Population                                                                                                                                                                                                                  |
| NCT06546670 | A Phase I/II Study of ITU512 in Healthy Participants and Patients With Sickle Cell Disease                                                                                                                                                                                                      |
| NCT07054684 | Study of BHV-1400 in IgA Nephropathy                                                                                                                                                                                                                                                            |
| NCT06758401 | This is a Study to Learn About How the Combination of the Study Medicines Sigvatug Vedotin Plus Pembrolizumab Works in People With Non-small Cell Lung Cancer With High Levels of PD-L1.                                                                                                        |
| NCT06500273 | Consolidation of First-Line MRD+ Remission With Cema-cel in Patients With LBCL                                                                                                                                                                                                                  |
| NCT05852717 | Safety and Efficacy of Epcoritamab With Gemcitabine, Dexamethasone, and Cisplatin (GDP) Salvage Chemotherapy in Relapsed Refractory Large B-cell Lymphoma                                                                                                                                       |
| NCT06806033 | A Study to Evaluate the Optimization of the Cytokine Release Syndrome Profile for Glofitamab in Combination With Gemcitabine Plus Oxaliplatin in Participants With Relapsed/Refractory Aggressive B-Cell Non-Hodgkin's Lymphoma                                                                 |
| NCT06890884 | A Clinical Study of Zilovetamab Vedotin (MK-2140) Plus Rituximab Plus Cyclophosphamide, Doxorubicin, and Prednisone (R-CHP) Versus Polatuzumab Vedotin Plus R-CHP in People With Diffuse Large B-cell Lymphoma (DLBCL) (MK-2140-011/waveLINE-011)                                               |
| NCT06717347 | A Study to Evaluate Zilovetamab Vedotin (MK-2140) Combination With Rituximab Plus Cyclophosphamide, Doxorubicin, and Prednisone (R-CHP) Versus Rituximab Plus Cyclophosphamide, Doxorubicin, Vincristine, and Prednisone (R-CHOP) in Participants With Previously Untreated DLBCL (MK-2140-010) |
| NCT05139017 | A Study of Zilovetamab Vedotin (MK-2140) in Combination With Standard of Care in Participants With Relapsed or Refractory Diffuse Large B-Cell Lymphoma (rrDLBCL) (MK-2140-003)                                                                                                                 |
| NCT04920617 | DPX-Survivac and Pembrolizumab With and Without Intermittent Low-Dose Cyclophosphamide, in Subjects With Relapsed/Refractory Diffuse Large B-Cell Lymphoma                                                                                                                                      |
| NCT06662994 | High Dose Aflibercept in Diabetic Macular Edema in Patients With Previous Vitrectomy                                                                                                                                                                                                            |
| NCT06785636 | Open-Label Study of Pocenbrodib Alone and in Combination With Abiraterone Acetate, Olaparib, or 177Lu-PSMA-617                                                                                                                                                                                  |

|             |                                                                                                                                                                                                                                                 |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCT06863272 | A Clinical Study of Ifinatamab Deruxtecan Based Treatment Combinations or as Monotherapy to Treat Metastatic Castrate Resistant Prostate Cancer (mCRPC) (MK-2400-01A/IDEate-Prostate02)                                                         |
| NCT06091865 | A Study to Compare How Well Odronextamab Combined With Chemotherapy Works and How Safe it is Against Rituximab Combined With Chemotherapy, in Adult Patients With Previously Untreated Diffuse Large B-cell Lymphoma                            |
| NCT06624085 | A Study Evaluating the Safety and Efficacy of Glofitamab + Gemcitabine + Oxaliplatin in U.S. Patients With Relapsed or Refractory Diffuse Large B-Cell Lymphoma                                                                                 |
| NCT05490472 | JAB-2485 Activity in Adult Patients With Advanced Solid Tumors                                                                                                                                                                                  |
| NCT05824975 | A Study to Evaluate the Safety and Therapeutic Activity of GI-102 As a Single Agent and in Combination with Conventional Anti-cancer Drugs, Pembrolizumab or Trastuzumab Deruxtecan(T-DXd) in Patients with Advanced Solid Tumors (KEYNOTE-G08) |
| NCT06481306 | A Study to Evaluate BMS-986470 in Healthy Volunteers and Participants With Sickle Cell Disease                                                                                                                                                  |
| NCT05785741 | A Study of DB-1310 in Advanced/Metastatic Solid Tumors                                                                                                                                                                                          |
| NCT05438563 | MRI-guided Transurethral Urethral Ultrasound Ablation for the Treatment of Low to Intermediate Grade Prostate Cancer                                                                                                                            |
| NCT05819385 | Connective Tissue Disease-associated Interstitial Lung Diseases (CTD-ILD) Epidemiology Non-interventional Study (NIS)                                                                                                                           |
| NCT06385886 | Recruitment and Engagement in Care to Impact Practice Enhancement (RECIPE) for Sickle Cell Disease                                                                                                                                              |
| NCT06385886 | Recruitment and Engagement in Care to Impact Practice Enhancement (RECIPE) for Sickle Cell Disease                                                                                                                                              |
| NCT05410977 | Collecting Blood and Stool Samples to Detect Colorectal Cancer or Advanced Neoplasia in Lynch Syndrome Patients                                                                                                                                 |
| NCT06933472 | A Study of a Novel Iron-based Phosphate Binder AP301 in Patients With Hyperphosphatemia in the U.S. and China                                                                                                                                   |
| NCT04055818 | A Study of Nicotinamide With Oral Tetrahydrouridine and Decitabine to Treat High Risk Sickle Cell Disease                                                                                                                                       |
| NCT04055818 | A Study of Nicotinamide With Oral Tetrahydrouridine and Decitabine to Treat High Risk Sickle Cell Disease                                                                                                                                       |
| NCT05952024 | Study of Acalabrutinib and Rituximab in Untreated Elderly and/or Frail Patients With DLBCL                                                                                                                                                      |
| NCT04268849 | Trial of IV vs Oral Iron Treatment of Iron Deficiency Anemia in the Post-Operative Bariatric Surgical Patient                                                                                                                                   |
| NCT04819841 | Gene Correction in Autologous CD34+ Hematopoietic Stem Cells (HbS to HbA) to Treat Severe Sickle Cell Disease                                                                                                                                   |
| NCT04819841 | Gene Correction in Autologous CD34+ Hematopoietic Stem Cells (HbS to HbA) to Treat Severe Sickle Cell Disease                                                                                                                                   |
| NCT06445062 | Study of RAS(ON) Inhibitors in Patients With Gastrointestinal Solid Tumors                                                                                                                                                                      |
| NCT07392190 | A Study of Eloralintide (LY3841136) in Participants With Persistent Obesity Who Are Treated With a Weekly Incretin                                                                                                                              |
| NCT06810544 | Safety and Tolerability of TNG456 Alone and in Combination With Abemaciclib in Patients With Solid Tumors With MTAP Loss                                                                                                                        |
| NCT07357415 | A Study of Retatrutide (LY3437943) in Participants Without Type 2 Diabetes Who Have Obesity or Overweight                                                                                                                                       |

|             |                                                                                                                                                                                                                                 |
|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCT05653271 | ACE1831 in Adult Subjects With Relapsed/ Refractory CD20-expressing B-cell Malignancies                                                                                                                                         |
| NCT07351045 | A Clinical Study to Evaluate the Effects of Enicepatide (RO7795068) in Participants With Obesity or Overweight Without Type 2 Diabetes                                                                                          |
| NCT05045066 | Immunological Effects of Vitamin D Replacement Among Black/African American Prostate Cancer Patients                                                                                                                            |
| NCT06499285 | A Study of Elritercept to Treat Anemia in Adults With Very Low, Low, or Intermediate Risk Myelodysplastic Syndromes (MDS) Who Need Regular Blood Transfusions                                                                   |
| NCT06720987 | A Study to Investigate the Safety and Efficacy of KQB365 as Monotherapy and in Combination in Participants With Advanced Solid Malignancies                                                                                     |
| NCT05902988 | A Phase I/II Study of VLS-1488 in Subjects With Advanced Cancer                                                                                                                                                                 |
| NCT06252649 | Study of Sotorasib, Panitumumab and FOLFIRI Versus FOLFIRI With or Without Bevacizumab-awwb in Treatment-naïve Participants With Metastatic Colorectal Cancer With KRAS p.G12C Mutation                                         |
| NCT04929223 | A Study Evaluating the Safety and Efficacy of Targeted Therapies in Subpopulations of Patients With Metastatic Colorectal Cancer (INTRINSIC)                                                                                    |
| NCT07086976 | A Study to Investigate the Efficacy, Safety, and Pharmacokinetics of Oral Rilzabrutinib Compared With Placebo in Participants 18 Years of Age and Older With Warm Autoimmune Hemolytic Anemia                                   |
| NCT07446322 | FOLFIRI and Bevacizumab With or Without Pelareorep for Second-Line Treatment of Metastatic RAS-Mutated, Microsatellite-Stable Colorectal Cancer                                                                                 |
| NCT06112418 | A Randomized Comparison of Stage-Based Care Versus Risk Factor-Based Care for Prevention of Cardiovascular Events                                                                                                               |
| NCT07227025 | A Study of Amivantamab and Olomorasib Combination Therapy in Participants With Metastatic Non-Small Cell Lung Cancer                                                                                                            |
| NCT06991556 | An Open-label Study of JSB462 (Luxdegalutamide) in Combination With Abiraterone in Adult Male Patients With Metastatic Hormone-sensitive Prostate Cancer (mHSPC)                                                                |
| NCT06625775 | Open-Label Study of BBO-10203 in Subjects With Advanced Solid Tumors                                                                                                                                                            |
| NCT06868277 | A Global Phase III Study of Rilvegostomig or Pembrolizumab Monotherapy for First-Line Treatment of PD-L1-high Metastatic Non-small Cell Lung Cancer                                                                             |
| NCT06907043 | A Study of PARP1 Selective Inhibitor, EIK1004 (IMP1707) in Participants With Advanced Solid Tumors.                                                                                                                             |
| NCT06999798 | An Optimized Ultrasound Twinkling Marker for the Imaging of Lymph Nodes in Patients With Clinically Node-Positive Breast Cancer, The UTMOST2 Trial                                                                              |
| NCT06349473 | A Study of Safety, Tolerability, Pharmacokinetics, and Pharmacodynamics of SR604 in Two Participants Groups (Part A: Healthy Participants, and Part B: Participants With Hemophilia A or Hemophilia B or Factor VII Deficiency) |
| NCT04701476 | TATE and Pembrolizumab (MK3475) in mCRC and NSCLC                                                                                                                                                                               |
| NCT06567795 | PRimary IndividualiZed Evaluation of Cardiovascular Events in Patients With Diabetes Mellitus Using hemoTAG                                                                                                                     |

|             |                                                                                                                                                                                                              |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCT07222800 | Symbiotic-GI-03: A Study to Learn About the Study Medicine Called PF-08634404 in Combination With Chemotherapy in Adult Participants With Metastatic Colorectal Cancer                                       |
| NCT06767514 | Clinical Study of Ivonescimab for First-line Treatment of Metastatic NSCLC Patients With High PD-L1                                                                                                          |
| NCT06393374 | Sacituzumab Tirumotecan (MK-2870) Plus Pembrolizumab Versus TPC in TNBC Who Did Not Achieve pCR (MK-2870-012)                                                                                                |
| NCT06439082 | A Study to Investigate the Efficacy and Safety of Crizanlizumab (5 mg/kg) Compared With Placebo in Adolescent and Adult Sickle Cell Disease Patients Who Experience Frequent Vaso-Occlusive Crises (SPARKLE) |
| NCT05431088 | A Phase 2/3 Study in Adult and Adolescent Participants With SCD                                                                                                                                              |
| NCT07416604 | A Clinical Study to Evaluate the Effects of NXT007 Compared to Emicizumab Prophylaxis in People With Hemophilia A                                                                                            |
| NCT04676048 | ASC618 Gene Therapy in Hemophilia A Patients                                                                                                                                                                 |
| NCT05663502 | Collecting Blood and Tissue Sample Donations for Research for HIV/AIDS-Related Cancers                                                                                                                       |
| NCT07082920 | A Study of JNJ-78278343 in Combination With JNJ-95298177 for Treatment of Prostate Cancer                                                                                                                    |
| NCT06145373 | A Study to Test a Medicine (Fitusiran) for Preventing Bleeds in People With Severe Hemophilia Who Previously Received Preventive Treatment With Emicizumab                                                   |
| NCT06296485 | Safer Aging With Diabetes Monitoring                                                                                                                                                                         |
| NCT06941870 | Efanesoctocog Alfa Prophylaxis in Patients With Hemophilia A With Synovial Hypertrophy                                                                                                                       |
| NCT06703606 | A Study to Learn About How Changing Therapy From Emicizumab to Marstacimab Affects People With the Severe Hemophilia A.                                                                                      |
| NCT06445738 | Post-operative Radiotherapy Omission in Selected Patients With Early Breast Cancer Trial International VErSion (PROSPECTIVE)                                                                                 |
| NCT05885412 | A Phase 1, Dose Escalation Trial of RP-A601 in Subjects With PKP2 Variant-Mediated Arrhythmogenic Cardiomyopathy (PKP2-ACM)                                                                                  |
| NCT06659029 | Prospective Registry Investigating Maternal and Infant Outcomes in Anifrolumab Users                                                                                                                         |
| NCT07187973 | A Phase 1b, Open-Label Study of DISC-3405 in Participants With Sickle Cell Disease (SCD)                                                                                                                     |
| NCT04432623 | The BENEFiTS Trial in Beta Thalassemia Intermedia                                                                                                                                                            |
| NCT04432623 | The BENEFiTS Trial in Beta Thalassemia Intermedia                                                                                                                                                            |
| NCT07361562 | A Study of a Selective ERBB2 Inhibitor (CGT4255), in Patients With Advanced Solid Tumors                                                                                                                     |
| NCT06612268 | A Study to Evaluate How Well Etavopivat Works in People With Sickle Cell Disease                                                                                                                             |
| NCT06612268 | A Study to Evaluate How Well Etavopivat Works in People With Sickle Cell Disease                                                                                                                             |
| NCT07029399 | A Study With NKT5097 for Adults With Advanced/Metastatic Solid Tumors                                                                                                                                        |
| NCT07023666 | Early Screening and Treatment of Heart Complication in Sickle Cell Disease                                                                                                                                   |

|             |                                                                                                                                                                                                                                                                                                            |
|-------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCT05005403 | Study to Assess Adverse Events and Pharmacokinetics in Adult Participants With Non-Small Cell Lung Cancer, Head and Neck Squamous Cell Carcinoma and Other Solid Tumors, Receiving Intravenous Infusion of Azirkitug Alone or in Combination(s) With Budigalimab, Bevacizumab, or Telisotuzumab Adizutecan |
| NCT05985655 | Study to Assess GTAEXS617 in Participants With Advanced Solid Tumors                                                                                                                                                                                                                                       |
| NCT05867251 | Study of AVZO-021 in Patients With Advanced Solid Tumors                                                                                                                                                                                                                                                   |
| NCT05935358 | Nuwiq for Perioperative Management Of Patients With Haemophilia A on Emicizumab Regular Prophylaxis Study                                                                                                                                                                                                  |
| NCT07046923 | A Study of LY4175408 in Participants With Advanced Cancer                                                                                                                                                                                                                                                  |
| NCT07288359 | Study of GVV858 as a Single Agent or in Combination With Endocrine Therapy in Patients With HR+/HER2- Breast Cancer and Other Advanced Solid Tumors                                                                                                                                                        |
| NCT04862663 | Capivasertib + CDK4/6i + Fulvestrant for Advanced/Metastatic HR+/HER2- Breast Cancer (CAPItello-292)                                                                                                                                                                                                       |
| NCT06120283 | BGB-43395 Alone or as Part of Combination Therapies in Participants With Breast Cancer and Other Advanced Solid Tumors                                                                                                                                                                                     |
| NCT05187832 | A Study of AND019 in Women With ER Positive HER2 Negative Advanced or Metastatic Breast Cancer                                                                                                                                                                                                             |
| NCT05508906 | Phase 1b Study of OP-1250 (Palazestrant) in Combination With Ribociclib, Alpelisib, Everolimus, or Atirmociclib in ER+, HER2- Breast Cancer                                                                                                                                                                |
| NCT06369285 | A Study of Alisertib in Combination With Endocrine Therapy in Patients With HR-positive, HER2-negative Recurrent or Metastatic Breast Cancer                                                                                                                                                               |
| NCT02926690 | Safety Study of MELK Inhibitor to Treat Patients With Advanced Breast Cancer and Triple Negative Breast Cancer                                                                                                                                                                                             |
| NCT07085767 | Palazestrant in Combination With Ribociclib for the First-line Treatment of ER+/HER2- Advanced Breast Cancer                                                                                                                                                                                               |
| NCT06885034 | A Study to Test the Safety and Effectiveness of GSK5764227, Alone or With Other Treatments, in Participants With Advanced Gastrointestinal Cancers That Cannot be Surgically Removed                                                                                                                       |
| NCT07271186 | Study to Assess the Effects of Angiopoietin-like Protein 3 (ANGPTL3) Inhibition in Adult Participants With Diabetic Kidney Disease                                                                                                                                                                         |
| NCT06230185 | CtDNA Based MRD Testing for NAC Monitoring in TNBC                                                                                                                                                                                                                                                         |
| NCT05774951 | A Study of Camizestrant in ER+/HER2- Early Breast Cancer After at Least 2 Years of Standard Adjuvant Endocrine Therapy                                                                                                                                                                                     |
| NCT07206121 | Feasibility Study for the SIRA-1000, SIRA® RFA Electrosurgical Device as an Adjunct to Breast Conserving Surgery                                                                                                                                                                                           |
| NCT05125016 | A Trial to Find Out if REGN4336 is Safe and How Well it Works Alone and in Combination With REGN5678 for Adult Participants With Advanced Prostate Cancer                                                                                                                                                  |
| NCT07015190 | Neoadjuvant Darovasertib in Primary Uveal Melanoma                                                                                                                                                                                                                                                         |
| NCT06975865 | The Efficacy and Safety of Rilzabrutinib in Participants Aged 10 to 65 Years With Sickle-cell Disease                                                                                                                                                                                                      |
| NCT07242469 | A Clinical Trial of MK-1403 in Participants With Type 2 Diabetes Mellitus (MK-1403-006)                                                                                                                                                                                                                    |

|             |                                                                                                                                                                                                                                                     |

| NCT05011383 | High Dose Testosterone for ATM, CDK12 or CHEK2 Altered Prostate Cancers                                                                                                                                                                             |
| NCT07564414 | A Research Study to Look at How Two Different Doses of CagriSema and One Dose of Semaglutide Help People Living With Obesity With or Without Type 2 Diabetes Lose Weight                                                                            |
| NCT07282600 | A Study of Eloralintide (LY3841136) in Participants With Obesity or Overweight, and Type 2 Diabetes                                                                                                                                                 |
| NCT04802759 | A Study Evaluating the Efficacy and Safety of Multiple Treatment Combinations in Participants With Breast Cancer                                                                                                                                    |
| NCT06379789 | A Study to Investigate the Safety and Effectiveness of a Coagulation Factor IX Gene Insertion Therapy (REGV131-LNP1265) in Pediatric, Adolescent and Adult Participants With Hemophilia B                                                           |
| NCT05319314 | GCC19CART for Patients With Metastatic Colorectal Cancer                                                                                                                                                                                            |
| NCT06611436 | BeCoMe-9: A Clinical Study of BE-101 for the Treatment of Adults With Moderately Severe or Severe Hemophilia B                                                                                                                                      |
| NCT05936580 | Nuwiq Dosing and Outcomes In the ManagEment of Women/Girls With Haemophilia A Needing FVIII Treatment for Surgery                                                                                                                                   |
| NCT05755867 | Global PNH Patient Registry                                                                                                                                                                                                                         |
| NCT06411626 | Home Reported Outcomes in PNH                                                                                                                                                                                                                       |
| NCT06524726 | The International PNH Interest Group PNH Registry                                                                                                                                                                                                   |
| NCT06401889 | Enhancing Skin Appearance and Quality of Life in Breast Cancer Survivors on Aromatase Inhibitor Therapy                                                                                                                                             |
| NCT06065748 | A Study to Evaluate Efficacy and Safety of Giredestrant Compared With Fulvestrant (Plus a CDK4/6 Inhibitor), in Participants With ER-Positive, HER2-Negative Advanced Breast Cancer Resistant to Adjuvant Endocrine Therapy (pionERA Breast Cancer) |
| NCT05696626 | Evaluation of Lasofoxifene Combined With Abemaciclib Compared With Fulvestrant Combined With Abemaciclib in Locally Advanced or Metastatic ER+/HER2- Breast Cancer With an ESR1 Mutation                                                            |
| NCT07541079 | A Study Evaluating Adherence, Tolerability, and Patient Reported Outcomes of Giredestrant in Participants With ER+/HER2- Early Breast Cancer Who Are Intolerant to Adjuvant Aromatase Inhibitor Therapy (novERA Breast Cancer)                      |
| NCT07287098 | A Study of Imlunestrant (LY3484356) in Premenopausal Women With Estrogen Receptor-Positive (ER+) Human Epidermal Growth Factor Receptor 2 Negative (HER2-) Early Breast Cancer                                                                      |
| NCT06253871 | A Phase 1/1b Study of IAM1363 in HER2 Cancers                                                                                                                                                                                                       |
| NCT07192432 | Gene Therapy for HER-Positive Cancer (SENTRY-HER2)                                                                                                                                                                                                  |
| NCT04852887 | De-Escalation of Breast Radiation Trial for Hormone Sensitive, HER-2 Negative, Oncotype Recurrence Score Less Than or Equal to 18 Breast Cancer (DEBRA)                                                                                             |
| NCT06324357 | Beamion BCGC-1: A Study to Find a Suitable Dose of Zongertinib Used Alone and in Combination With Other Treatments to Test Whether it Helps People With Different Types of HER2+ Cancer That Has Spread                                             |

|             |                                                                                                                                                                                              |
|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NCT06003387 | Efficacy and Safety of CSL222 (Etranacogene Dezaparvovec) Gene Therapy in Adults With Hemophilia B With Pretreatment Adeno-associated Virus Serotype 5 (AAV5) Neutralizing Antibodies (Nabs) |
| NCT04517838 | Immune Response to Anti-HER2 Therapies in Patients With HER2-Positive Stage I-IV Breast Cancer                                                                                               |
| NCT07465224 | A Study to Evaluate ALN-4324 on Insulin Sensitivity in Adults With Type 2 Diabetes Mellitus                                                                                                  |
| NCT07422480 | A Study to Compare Elritercept With Epoetin Alfa to Treat Anemia in Adults With Very Low, Low, or Intermediate Risk Myelodysplastic Syndromes (MDS) Who Need Regular Blood Transfusions      |
| NCT07222475 | Writing Relaxing Beats in Adolescents Who Have Sick Cell Disease                                                                                                                             |
| NCT06517875 | Study of Mometinib in Combination With Luspatercept in Participants With Transfusion Dependent Myelofibrosis                                                                                 |
| NCT07222475 | Writing Relaxing Beats in Adolescents Who Have Sick Cell Disease                                                                                                                             |
| NCT07282743 | Efficacy and Safety of GL0034 in Overweight or Obese Adults With Type II Diabetes Mellitus                                                                                                   |
| NCT06943521 | A Study of MT-4561 in Patients With Various Advanced Solid Tumors                                                                                                                            |
| NCT06897475 | A Study of LY3457263 Compared With Placebo in Participants With Type 2 Diabetes on a Stable Dose of Semaglutide or Tirzepatide                                                               |
| NCT07215312 | A Study of LY3938577 in Participants With Type 2 Diabetes Previously Treated With Basal Insulin                                                                                              |
| NCT04872166 | A Study of BTX-A51 in People With Advanced Solid Tumor and Breast Cancer                                                                                                                     |
| NCT07524322 | Study of RGT-490 in Patients With PIK3CA-Mutated Advanced Solid Tumors                                                                                                                       |
| NCT05208762 | A Study of PF-08046054/SGN-PDL1V in Advanced Solid Tumors                                                                                                                                    |
| NCT07502508 | Phase 2 Trial of Icovamenib in Participants With Type 2 Diabetes Mellitus Who Are Not Achieving Glycemic Targets While Using GLP-1-Based Therapy                                             |
| NCT06312644 | Study of Ultomiris® (Ravulizumab) Safety in Pregnancy                                                                                                                                        |
| NCT07033026 | An Evaluation of NGM120 in a Randomized, Double-blind, Placebo-controlled Study in Participants With Colorectal Cancer Who Have Cancer Cachexia.                                             |
|             |                                                                                                                                                                                              |
